

## **Home Health Hazards for Tenants, Children and Health Care Workers**

In this module you will review home health hazards for tenants, children and health care workers.

**ACTIVITY:** Reflect on your practice, thinking of homes you have visited, and using the resources below; **make a list of 10 different types of hazards** in the home for each group (tenants, children, and staff).

### **Tenants**

- See Home Safety Checklist: [Keeping Safe, In and Around Your Home](#)
- For a more comprehensive checklist go to [www.homesafetycheck.ca](http://www.homesafetycheck.ca)
- Review the [Health Canada Hazardcheck booklet](#) (tenants and children).
- Try the [Health Canada Hazardcheck Virtual Tour](#) (tenants and children).

**You do not need to explore every room in the House Tour.**

- Review the [CPSC Home Electrical Safety Checklist](#) (tenants and children).

### **Children**

- Review the [Give Your Child a Safe Start](#) booklet.

### **Health Care Workers**

The **Safety Assessment Form (SAFT) checklist** is a comprehensive list of the types of hazards you should be looking for at the time of first assessment, in order to create a Safe Visit Plan for the client.
